

Emirhan Canan

Software & Game Developer

A passionate Software and Game Developer with a degree in Computer Programming from Istanbul Commerce University. I specialize in building engaging PC and mobile projects utilizing Unreal Engine, Unity, and Android Studio. By bridging my technical foundation in software architecture, coding, and QA testing with the leadership, crisis management, and teamwork skills developed as a Riot Games Campus Ambassador and Esports Committee President, I aim to deliver highly versatile and impactful contributions to game development teams.

Work Experience

OXS Games | Game Development Intern

Jun 2026 - Aug 2026

- Actively participated in the production and design processes of the game development studio.
- Conducted QA testing on the company's website, identifying software bugs and reporting them directly to the development team.
- Executed playtesting for in-development mobile games, focusing on gameplay mechanics, performance, and optimization, while providing technical feedback to enhance the overall User Experience (UX).
- Directly contributed to brainstorming sessions and design processes for developing new game concepts, core mechanics, and improving existing projects.

Esports Referee & Event Staff (Riot Games / Optimi)

2024 - 2026

- Tournament Operations & Refereeing:** Officiated and managed tournament fixtures for Turkey's largest League of Legends, Valorant, Wild Rift, and TFT tournaments hosted under Papara SuperMassive GamerHub and Optimi.
- Special Events & Organization:** Served as an event coordinator and referee at the Arcane series premiere at ESA Esports Arena, and worked as event staff during the ticketed LoL Worlds viewing party at Paribu Cineverse.
- Broadcast & Production Management:** Managed live broadcast production via OBS and operated as an in-game observer for large-scale esports events, including Summerfest.
- Brand Representation:** Acted as a brand representative for Optimi at GGCon, managing face-to-face communication and active engagement with attendees.

Independent Game & Mobile App Developer

2024 - 2026

- YUCA (Unreal Engine 3D Survival Horror Game):** Managed the end-to-end production pipeline as a solo developer. Built environments and level designs from the ground up. Utilized the Blueprint visual scripting system to program the core gameplay loop, AI enemy algorithms, inventory mechanics, and integrated dynamic lighting and audio systems directly into the engine.
- Dürüm Zamanı! (2D Time Management Simulation):** Established the entire technical architecture from scratch as a solo developer. Programmed the core loop, resource management systems, and dynamic user interface (UI) integrations using C#. Handled the complete development lifecycle, from initial mechanic design to final performance optimization for mobile constraints.
- Android Mobile Application Development:** Designed and developed functional mobile applications from scratch using Android Studio. Managed the overall mobile architecture, user-friendly UI/UX design, and functional coding processes, seamlessly integrating specialized database schemas and custom 3D card-flip animations to enhance the user experience.

Education

Istanbul Commerce University
2024 - 2026

Associate Degree in Computer Programming

Esports Committee President & Sports Club Board Member

Served on the Sports Club Executive Board and managed the university's Esports Committee throughout the academic duration, successfully organizing gaming events and fostering the campus gaming community.

Technical Skills

- Game Engines: Unity, Unreal Engine
- Programming Languages: C, C++, C#, Python, Java, JavaScript, HTML, CSS
- Development Tools: Git, GitHub, Visual Studio
- Broadcast & Production Tools: OBS, In-game Observer Tools, Live Broadcast Management
- Certifications: Mikro Accounting Software Certificate

Core Competencies

- Event & Organization Management
- Leadership & Teamwork
- Community Management
- Game Design & Development Vision

Languages

Turkish: Native

English: B2
